Nifty On The Path To Create New Peaks

In our monthly outlook for July, we were extremely bullish and clearly predicted that Nifty will create new high and reach its peak towards the end of July. We clearly indicated the exact date range **(July 26-27)** for this occurrence as well. We have once again proved beyond doubt that our readings and inferences drawn from the Astro charts are reliable and the date range forecast are right on target, as can be seen yet again from our July predictions.

The month of July 2018 saw the Nifty resumed its rally from the bottom, continuing moving upwards and developing the uptrend. As predicted Nifty reached record high towards the end of Month. The month of August will see Nifty continue the its upward journey. Nifty began its journey from the levels of 10714 and moved upwards to breach the 11200 mark by the end of July.

WATCH NIFTY AT NEW LEVELS- AUGUST 2018 OUTLOOK

In the month of August the planetary positions will come back to normal. The Astro cycles indicate a bullish trend for Nifty especially in the second half of the month.

The market has been going through phases of volatility and divergence from the initial months of this year. This trend of divergence and volatility will take a backseat in this month thus, bringing back normalcy in the market.

The bullish trend will resume and continue at a good pace post August 17th. It is also indicated that from mid August onwards Midcaps will stabilize and offer good gains.

We do not recommend any particular sector in this month, stocks with good fundamentals will give good returns.

Important Dates in August

August 16, 2018: Key Bearish Day

August 23, 2018: Key Bullish Day

EXPERT RECOMMENDATIONS

Every dip in the market is going to be an excellent opportunity to take long position in Nifty.
