August 2020

Dual phase with Weakened Positive planetary positions -
Indecisiveness for participants and Nifty to turn range bound.

July 2020 Performance Outlook

Our heading for July report was **“Nifty to continue up-trend followed by consolidation phase - trend followed by range bound journey”**. This stood accurate with nifty topping the levels by 11,850 and kept continuing until the consolidation phase and further ended at 11,073 on 31st July 2020.

July stood to be an impressive month for Nifty. It rallied one way led by short coverings, further leading to huge recovery from the bottom in march. Jio being the main leader as we predicted in our yearly analysis report. Also, the Global cues equally supported the market this month.

Further, we also encountered multiple announcements for the vaccines from various countries of the world which added to the optimism of the markets as expected..

Time Theory Astro Outlook for August 2020

As per Time Theory, we will witness two major Planetary changes this month. The first cycle will be from 1st August 2020 to 20th August 2020 and another Major planetary transition will take place on 20th August and this trend will persist till the end of the month.

Certain positive planets have lost their strength and that has led the market to juggle. Though the positive planetary positions are still on, the losses will keep recovering due to lesser strength but the coverage will fall weak.

This will further lead the market to juggle in levels. Apart from that, the traders will continue booking profits. As a matter of fact, profits will be booked every couple of days. July will lead to the end of all the positive news in the market.

Time Theory Astro Outlook for August 2020

The planetary positions will lead the market to keep hovering in a range. Any up will be frequently sold off and any negative will also be frequently bought. This will conduct the intraday swinging of the trend.

In the first Astro-cycle, i.e 1st August - 20th August, the market will keep juggling and in the next cycle which starts from 20th and endures till 30th August, the market will witness the negative trend.

Market Trends – Important Dates

August 3rd – 7th:

The monthly cycle will get neutral and in this week daily days will be seen forthcoming in a mixed pattern. This will keep the market range bound but it will sustain pressure on levels..

August 10th – 14th:

Market may rise at the beginning of the week and in the end, it will have profit booking. This will be very volatile week.

August 12th:

off.

Market Trends – Important Dates

August 16th – 24th:

Market will stay range-bound. The range will get broad and downside as well.

August 24th - 30th:

On 24th Aug, we will have a correction. The rest of the days will be normal.

We may find many trading days which will have a gap down opening and then the market will recover. The market will foresee mixed bag days. Yet it will not come under the negative territory, but the positive planetary positions will be neutralized. And which keep giving the market blows. As per our Astro charts, the Positive planetary positions have weakened, which reflects that bears will try to take over but Bulls won't allow them to do so.

Time Theory Predictions for Crude and Currency

There will be no major events or geopolitical events to happen this month.

Crude and currency will start softening. Crude prices will stop soaring up and will have a profit booking.

Surprisingly, this time all the asset classes have rallied. We have seen a tremendous rally in Gold, Silver and after crash in Nifty and Crude oil too. This month will end with the positive cycles for many asset classes.

Gold - In 2019, we were Bullish on Gold till 2020. With this newsletter, we end the buy call and suggest our subscribers to start booking profits on Gold.

Silver - We have started with the Bullish call on silver in 2019 and we strongly advice our subscribers to start with booking profit from this month as it will end with the rally in the month of September.

September is the month where the final long rally of gold and silver will take a pause.

Expert Recommendations

We are now at the edge of the bullish rally and will advise bulls to start gradually booking profits for the trades started from March. Though this month's levels will have pressure so there we will suggest the traders to go for range-bound strategies, and range should broad.
