Financial Market Trend Predictions - June 2021

2021

June 2021 Performance Outlook

The month of June 2021 ended with Nifty closing in the red.

As we precisely predicted, Nifty gave a breakout, followed by a rally which extended till 14 June creating the top.

Nifty Bank was in focus and as we had indicated in our newsletter for June, on 21 June, a huge short-covering was seen in Nifty Bank and there onwards the market, although we expected a bearish cycle, turned positive.

Astro Outlook for the Month - July 2021

In the month of July, as indicated by Time Theory, there will be two cycles that are going to be active. Some of the important trends to watch out for this month are:

Thursday, 1 July: Market will stay volatile. Nifty will stay range-bound in the first two days of the month.

Monday 05 July: Both the cycles of Time Theory will get positive and this will trigger another breakout in the Market.

Astro Outlook for the Month - July 2021

In two cycles, Nifty and Bank Nifty both have extremely positive forces backing them up and this will lead to a very good performance by both these indexes.

Wednesday, 07 July: Until this date, Bank Nifty and Nifty will follow a more or less equal trend, post July 7th onwards, Nifty will start catching up.

Thursday, 22 July – Friday, 23 July: The rally will extend around the date range of 22 - 23 July, creating the top for the market. The rally could be straight without any hiccups and could be unexpected by participants after a long period.

Friday, 23, July – Friday, 30 July: Post the 22nd – 23rd rally, there are indications of a change in the cycle which will result in the bears tightening their grip on the market. Watch out as there could be a patch of correction from 22 -23 July to 30 July.

Astro Outlook for the Month - July 2021

The planetary setup for July 2021 is focussing more towards Bank Nifty and here onwards more than Nifty, it will be Bank Nifty that will witness correction in its levels.

After this, the fall could extend but there is a high possibility that it will recover quickly creating an unexpected trap for Bulls and Bears both. Hence, we suggest that this will be the time to trade with high caution.

As two different cycles are activated, Market will be heavily volatile after 23 July and it will be a difficult time to trade as the Bulls will also be equally active.

Expert Recommendation

Based on the above mentioned time trends, we recommend that traders take long positions and stay in the market. Commence profit booking around the date range of July 22 – July 23 OR trade with strict stop loss after this date as market will stay volatile.
