## ***TRADING RANGE WILL BE ESTABLISH NIFTY TO HAVE BOUNCE***

As we clearly indicated in our last report, market witnessed negative trading sessions in the last week of October and will continue this trend into the first week of November too.

The market witnessed negative closing for two consecutive months. October witnessed some panic in the market and saw substantial drop in levels with 10<sup>th</sup> of October being the day when the bottom was created. The market experienced extreme volatility, however, as expected a relief rally was witnessed in the market mid week.

### **Astro Outlook For The Month - November 2018**

Nifty will have bounce in levels attributing to positive news in the initial of the month although at interval but mixed sentiments will lead to volatile and unclear trends. November will play host to some important events like Diwali, Elections, etc. which will have its impact on the market.

As per our readings, we expect the market to bounce till 06 of November till Diwali. After that it will trade range bound.

## Important Dates/Events This Month

### **Diwali: Market to have an extremely encouraging Diwali trading session.**

Pre-Diwali Muhurat trading, market will witness a bounce in levels and will have a positive trading session on 6 November. On the Diwali Trading day, the opening will be positive but the gains will be sold off at the end. A good day for profit booking in Nifty.

### **Elections: Key event that will set the note for future market prospects.**

Elections are due to be held in certain states of India and their results will be out in December. This is one of the key events that markets would be facing this month which will decide the future prospects of the market.

As per the readings from the astro charts, during the time zone of the election there seems to be no indication of any positive happenings, hence it is most likely that there will not be any positive market sentiments around this time that markets can bank on.

## **Expiry**

In the expiry, Nifty will experience a bounce due to short covering. Nifty will witness a positive session on the day before and on the day itself.

## **Expert Recommendations**

In this month also, we suggest that our subscribers stay short term and undertake short-term trading\*. Markets will experience movements of bounce backs as well as correction in levels in this month.

\* Please refer to our weekly reports for detailed indications and recommendations to assist you with short-term trading.
