COSMIC SHIFT-TREND CHANGE FOR CORPORATES AND COMMODITIES AND EQUITIES-17/09/2025

There is a significant cosmic transition. On 17th September, the Sun enters Virgo – Kanya Rashi. This transit marks a period of clarity, restructuring, and system building. Let's decode what this means for businesses and global economies."

Global & Indian Economy:

- Till mid-October, expect positive news flow globally, especially in geopolitics and economic policies.
- Many announcements, agreements, and talks will surface, though their immediate results may be limited.
- The world economy remains in a slowing phase, but this period brings softening of policies and optimism in the environment.

Impact on Business Houses:

- For top management, this is the right time to review policies, restructure systems, and create sustainable frameworks.

Industries most impacted:

- Jewellery & Gems sector (import–export heavy).
- Luxury goods and lifestyle products.
- Import–export dependent industries.
- Raw material-driven businesses (like metals, commodities).
- Currency and forex-related businesses.

Businesses should focus on currency trades, vendor contracts, and raw material pricing.

This is the right window to explore new territories and markets, but decisions need to be taken quickly – planetary support is strong for decisive action.

Market Outlook:

- Equities: Positive momentum expected, with optimism fueling short-term rallies.
- Gold & Silver: Will likely pause and consolidate – sideways movement with mild profit booking.
- Investors: Time to realign portfolios toward sustainable, system-driven sectors.

Sun in Virgo acts like the cosmic auditor – it demands order, efficiency, and discipline. For businesses, this is the perfect moment to reset, reorganize, and make decisions that build long-term sustainability. Whatever decisions you take now, planetary energies favor them – but remember, speed and clarity are key.”
