

Nifty on the Verge of a Breakout

Nifty is now preparing to break the important resistance level of 25200 and set its sights on the previous high.

From 15th September, the cosmic cycles are shifting, creating a powerful tailwind for the markets. This alignment favors the bulls and opens up an excellent opportunity for market participants to ride the next bullish wave.

Once Nifty crosses the 25200 barrier, the momentum will strengthen, paving the way for a decisive upward journey.

The conclusion of this cosmic cycle and its next turning point will be revealed in our upcoming newsletter. Stay tuned!
