FINANCIAL MARKET TREND PREDICTIONS

Astro Economics 2025-2026

Nifty September 2025 outlook

FINANCIAL MARKET TREND PREDICTIONS 2025

By Time Theory – Review of August 2025

As anticipated, August turned out to be a challenging month for Nifty. The index declined in the early part of the month and, post 16th August, entered into a consolidation phase, trading largely within a range until 29th August.

FINANCIAL MARKET TREND PREDICTIONS 2025

By Time Theory – September 2025 Astro-Cycles

The month of September is divided into two distinct astro-cycles, each shaping market behavior differently:

FINANCIAL MARKET TREND PREDICTIONS 2025

By Time Theory – Cycle 1: 1st – 15th September
(Influenced by Planet Mars)

Key Dates: 1st September and 5th September.

From 1st to 5th September, Nifty is expected to maintain its levels, attempting to hold support zones. Between 5th and 12th September, the index may come under pressure in most sessions taking the levels down.

FINANCIAL MARKET TREND PREDICTIONS 2025

By Time Theory – Cycle 2: 15th – 30th September

In the second half of the month, market pressure is again expected to dominate across the majority of trading days.

Similar to the first cycle, short-covering rallies may surface on select days, helping the index stay intact and avoiding significant breakdowns.

FINANCIAL MARKET TREND PREDICTIONS 2025

By Time Theory – Broader Outlook: The overall yearly astro-cycle remains negative, reducing the likelihood of any sustained uptrend during September.

Despite this, the month may present buying opportunities at lower levels, especially for short-term positions. These positions are likely to deliver decent returns in October 2025, when the planetary set-up becomes comparatively more favorable.

About Shubha Javaria

Financial Astro Consultant & Time Theory Expert -

Shubha Javaria is a leading name in the field of Financial Astro Consulting Services. Her fundamentally strong knowledge base of Vedic Astrology along with years of continuous research led her to launch her successful and unique Time Theory.
